PROFILE

Business and systems analysis professional focused on designing AI-enabled solutions around organizational needs. Combines process analysis, requirements definition and system design with data analysis and human-in-the-loop workflows. Uses evidence and iterative testing to assess design choices, with agent-assisted implementation where appropriate.

SKILLS

Business & System Analysis
Requirements analysis, process mapping, system & workflow design, evaluation

AI Workflow Design
Agent orchestration, context persistence, human-review boundaries

SQL
Joins, aggregations, CTEs, basic query optimization

Python
Pandas, NumPy, Matplotlib, Seaborn, Flask & Jinja templates

Power BI
Prior experience with data modeling & relationships

ETL & Data Prep
Cleaning, transformation, schema validation

CRM Analytics
Customer segmentation, cohort analysis, engagement metrics

SELECTED PROJECT / SHOWCASE

System & Workflow Designer · BuildRelay ↗ SHOWCASE — Oct 2026 – Present

Independent Project / Portfolio Showcase · Agent-Assisted Implementation

- Designed an end-to-end multiagent workflow turning natural-language briefs into structured software deliverables, with human review at phase completion.
- Defined system behavior, quality expectations, context persistence, linked result records, and SQLite logging; refined the design through observed issues.
- Directed agent-assisted implementation and reviewed phase completion; agents performed most of the coding.
- Tested workflow on an offline Python Flask app generating question-and-answer PDFs from form responses.

EXPERIENCE & ACTIVITIES

Independent Business Analyst / Consultant · Pulse Pilates CURRENT — Dec 2025 – Present

Muscat, Oman

- Compared booking-system options and planned and staged the studio's migration, including customer communication and risk mitigation; supported a completed migration and subsequent adjustments.
- Contributed business analysis to an in-studio cafe initiative, including requirements and market analysis, operational workflow and menu development.
- Advised on recruitment and personnel-management needs as part of the studio's business development initiative.

Teaching Assistant, Sustainability Honours · UvA Business School — Oct 2024 – Jun 2025

Amsterdam, Netherlands

- Prepared course materials, taught the climate change simulation workshop, and assessed student proposals and final projects.

Independent Research Participant · Big Data Analytics Group CURRENT — Feb 2023 – Present

Research & Professional Activities

- Research and write book and article summaries, tool introductions, and analyses of data- and AI-driven business models for executives and students.

Business Analytics Specialist · Sarshenas Consulting Services — Aug 2021 – Jul 2023

Consulting

- Analyzed business processes and performance metrics to identify improvement areas, developing data-driven recommendations for process mapping and workflow evaluation.
- Designed dashboards and KPI reports, contributing to scalable analytical frameworks for benchmarking and performance evaluation.

Data Analytics Trainee · Hamrah Academy — Aug 2020 – Jul 2021

Telecom Industry

- Analyzed large CRM datasets to uncover customer behavior, churn, and engagement patterns, supporting automated KPI dashboards for acquisition and retention.

Data Analytics Trainee · Rose Academy (Consultancy & Education) — Mar 2019 – Jul 2020

Retail Consulting

- Analyzed retail datasets to identify sales trends and inventory opportunities; cleaned, transformed, and visualized data using SQL, Power BI, and Excel.

Project Coordinator, Business Games League · University of Tehran — Nov 2019 – May 2020

Volunteer

- Coordinated a university-wide business strategy competition with industry partners, managing logistics, team registration, budgets, and sponsor communication.
